PROFILE

Passionate Computer Engineering student with a deep interest in software development, embedded systems, and modern web technologies. Focused on building projects that combine creativity with technical problem-solving.

PROJECTS

Personal Portfolio Website

Responsive cyberpunk-themed portfolio with animations and interactive UI components.

Student Management System

Console-based C++ application using OOP, file handling, and data structures.

Data Analysis Tool

Python tool for processing and visualizing datasets with statistical analysis.

Smart Home Monitoring

Arduino-based IoT system for temperature, humidity, and motion monitoring.

Task Manager App

Full-stack web app with authentication, real-time updates, and responsive design.

Algorithm Visualizer

Java application that visualizes sorting and searching algorithms.

SKILLS

HTML

CSS

JavaScript

React

TypeScript

C++

Python

Java

Node.js

SQL

Git

Arduino

Linux

Figma

EDUCATION

Computer Engineering (Student)

Coursework: Algorithms, Data Structures, Embedded Systems, Web Development
